EARMUFF 3M OPTIME3 HELMET P3E

Passive earmuff Optime™ III with P3E 30 mm helmet attachment. Black and red color. The large internal space in the earmuff helps to reduce the build-up of heat and moisture, and the soft and wide foam help to reduce the pressure around the ears, so they are comfortable to wear over a long period of time. It reduces noise levels by up to 34 dB, and is suitable for working environments with very high noise levels such as airports, engine rooms on ships, power plants, and printing works. The pads and foam are available as hygiene kits, are easy to replace if worn or damaged, which increases the lifetime of the product.

SKU: 0-6-10001-98-ST | **Categories:** Headwear, Hearing protection |
