

GLOVE ANSELL ALPHATEC® 58-735

Glove AlphaTec® 58-735 with nitrile barrier that provides advanced protection against chemicals from many commonly used chemicals. INTERCEPT™ cutting resistance technology provides ISO C cut protection. Optimized fit that integrates high visibility cut lining serves as an indicator for when the glove is punctured and highlights when chemical protection is compromised. Good dexterity and sensitivity. ANSELL GRIP™ technology for handling wet or oily parts provides improved dexterity, grip and comfort. The cuff can be folded to act as a drain to prevent chemicals from flowing down the arm. Suitable for handling metal plates and panels with sharp edges, removal of broken glass, discharge or leak clean-up, installation, installation and maintenance of components and machines, mixing or filling of chemicals, and cleaning of tools. Bundle: 6 pairs. Carton: 72 pairs.
