GLASSES

3M SECUREFIT 400 READERS SAFETY GLASSES

3M SecureFit Safety glasses consist of a frameless lens and fixed-length temples. An integrated side guard is included for extra protection. The temples also feature 3M Pressure Diffusion Temple technology which helps distribute pressure across the ear to improve the comfort of the frame for different users. This innovative design promotes increased comfort and a secure fit.

Classification

EN166 Class 1 F T

For comfortable eye protection with reader option to see small details clearly, use 3M™ SecureFit™ Safety Readers 400 Series. Our black/green frame safety glasses weigh just 19 g and have an additional +1.5, +2.0 or +2.5 dioptre part at the bottom which magnifies what you're viewing. They feature 3M™ Pressure Diffusion Temple Technology that allows dual-injected padded temple touchpoints to naturally adjust to an individual's head size, giving the wearer a secure and comfortable fit. Soft, adjustable nose pads provide an even greater personalisation of fit and reduce slippage from head movements. Wide flexible temple arms over the ears provide solid side protection and work well with ear muffs. The wraparound design gives the user a wide field of vision. The rimless polycarbonate lens comes with an anti-scratch/anti-fog coating for increased durability and visibility.
